

ADVANTAGES

- ▶ Valves for fluid technology for use in explosion hazard areas
- ▶ Explosion protection for gas, dust and mining
- ▶ Flameproof enclosures and intrinsic safety
- ▶ Solutions for all zones
- ▶ The valves comply with the requirements according to:
 - ATEX according to Directive 94/9/EC and standard EN 60079
 - IECEx according to standard IEC 60079
 - GOST Ex according to standard MEK 60079
- ▶ Wide product range
 - Solenoid operated spool valves
 - Poppet valves
 - Proportional spool valves
 - Proportional pressure valves
 - Proportional flow valves

APPLICATIONS

It is the climatic conditions which call for the use of explosion protected components, often together with high demands with respect to corrosion protection.

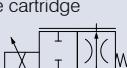

- ▶ As standard for - 25 °C ... +70 °C
- ▶ Optional for - 60 °C ... +70 °C
- ▶ High corrosion protection as standard
- ▶ Versions with very high corrosion protection right up to rust and acid-resistant on request
- ▶ The complete certifications can be found under:
